

## STONHARD'S ALTERNATIVE FOR POLISHED CONCRETE

Revolutionise your commercial or industrial floor spaces with Stoncrete EFX. It is the ideal choice for retail stores, lobbies, cafeterias, restaurants and corridors. Designed with the demands of commercial environments in mind, Stoncrete EFX is not only visually appealing but also built to withstand the rigors of daily use. Its longevity surpasses traditional flooring options, ensuring a lasting investment for your space.

### Products & Installation

Stoncrete EFX is a trowelled, epoxy mortar system that has the look and feel of polished concrete, but with longer lasting durability and performance. Stoncrete EFX can be used for new flooring or to resurface an existing floor.

### The Performance You Require

With no seams there are no crevices for dirt and bacteria to collect and it is an easy-to-clean surface. Stoncrete EFX is built to last and will maintain its finish for years to come. Textured options are available to suit your need for slip resistance.

Seamless

### The Design You Desire

Stoncrete EFX is available in five base colours and three unique decorative aggregates. The aggregate choices are 100% mirror glass, a blend of recycled amber glass or domestically mined quartz. All are available in matte, satin or semi-gloss finish. Love the look of polished concrete? You will love Stoncrete EFX more.

### The Expertise We Provide

Stonhard has more than a century of experience manufacturing and installing seamless floors. We meet safety regulations and honour specifications. Our direct sales force along with the Architectural Design & Engineering Team and Construction Management Group work with you from product recommendation to final walkthrough.

### A Singular Solution

Whether you're planning new flooring or looking to breathe new life into an existing surface, Stoncrete EFX provides a versatile solution.
