PRODUCTS USED:

Stonclad® UR • Stonkote® HT4 • Texture 3 • Stonshield® SLT

Family Tradition Combined with Continuous Improvement

Embutidos Artesanos J.Vilà, S.L. was founded in 1984, following the family tradition of butchering. Embutidos Artesanos is a leader in the meat industry of Northern Catalonia, Spain. The company is run by the original family along with a group of professional butchers who have extensive experience and training with the goal of maintaining the “Artisan” way of processing.

The recently expanded Embutidos Artesanos plant is equipped with modern technology which ensures that proper hygienic methods are maintained throughout the entire production process. This starts with the processing of raw material, which then passes through the cold rooms, production rooms, drying rooms, or cooking areas until it reaches the end of the production line. The company is continuously researching ways to improve products, always keeping their customers in mind. When it came to updating their facility, the company’s research efforts lead them to Stonhard for the best in hygienic, high-performance floors.

Stonhard Solutions

The 43,000 sq. ft. factory required specific flooring solutions for several different areas throughout the facility. For processing and cold rooms, Stonhard recommended Stonclad UR, a polyurethane mortar system designed for rapid installation. Stonclad UR is HAC-CP certified, thermal shock and cycling resistant, chemical resistant, and slip resistant, to name a few of its benefits for food plants.

Embutidos Artesanos also desired floors for the staff locker room and cafeteria that would be easy to clean for both hygienic and aesthetic reasons. Having experienced significant issues with acrylic floors, Stonhard’s Stonshield SLT would be a major improvement to their facility. This textured, decorative epoxy system is durable, slip resistant, and long lasting while offering ease of cleaning and maintenance, keeping these areas both spotless and attractive day after day, year after year.

The Stonhard Difference

Stonhard is the unprecedented world leader in manufacturing and installing high-performance polymer floor, wall and lining systems. Stonhard maintains 300 Territory Managers and 175 application crews worldwide who will work with you on design specification, project management, final walk through and service after the sale. Stonhard's single-source warranty covers both products and installation.
