artfully poured floors®

a brand of

STONHARD®

Uncommon designs, influential colors, and functional surfaces.

liquidelements is Stonhard's luxury collection of seamless floors. They bring seamless designs in dramatic looks for commercial interiors - hotels, showrooms, restaurants, stadiums, casinos, offices, and retail spaces.

Stonhard has over a century of experience formulating and installing resinous floors in commercial and industrial spaces.

CLARITY, COMMITMENT & CARING.

We are accountable for our products through their entire life cycle, protecting and honoring our planet by supporting the principles of green design. As members of the United States Green Building Council, we help you achieve LEED certification. We are also part of the HPD Collaborative, offering transparency on our products and showing our customers and end users that we take the necessary steps to support a balanced, healthy environment.

Color influences, inspires,

and speaks all languages.

Fresh and fun, brazen and bold, tart, tasteful, and timeless. What color are you? See our classic color collections, along with custom options to meet design requests or support company brand & identity guidelines.

This sleek, self-leveling floor offers depth and mood in a matte, satin, or gloss finish. Smooth performs in any contemporary commercial setting, stands up to extensive foot traffic, and is available in a spectrum of color choices, including the Duo line with complementary or contrasting color blends. Despite its rich finish, Smooth is resilient, scratch resistant, comfortable underfoot, and easy to maintain.

Nairobi Brown

Reflect is resilient, comfortable underfoot and easy to maintain. Its hammered finish, a swirling, illuminated surface borrows its palette from the Earth's landscape producing a natural and elegant floor.

A regular maintenance program is required to maintain high-gloss finishes.

reflect

REGAL
SOPHISTICATED
ELEGANT

Hotel Lobby // Reflect in a high-gloss finish

High design, high performance, this floor provides a busy metropolitan hotel lobby with a glossy, resilient floor that meets the demands of continuous foot traffic and wheeled luggage.

Adventurous colors fused with natural metals in this sparkling, glossy floor evoke iconic drama; from the Vegas Strip to haute couture runways, this dazzling, resilient floor will ensure comfort underfoot while remaining easy to clean and scratch resistant. A regular maintenance program is required to maintain high-gloss finishes.

CAPTURE

12

www.liquidelements.com

A thoroughly unique, reflective surface that encourages individualism. Capture allows you to set the mood and theme by locking inanimate objects in a rich, thick resin. Encasing printed graphics and artwork gives designers complete personalization of the floor. While each Capture theme is different, the floor remains resilient, comfortable underfoot, and easy to maintain.

capture

UNIQUE
VERSATILE
COMPLEX

Hotel Guest Room // Capture in a high-gloss finish, inspired by fashion designer, Alexander McQueen. Capture allows designers and artists to be as expressive as they want. Also part of the Artist Series, this floor delivers personality plus along with a resilient, ergonomic surface.

crush

BOLD
RICH
ORGANIC

Stone Age meets chic. Tumbled marble and natural aggregate options are set in a high-gloss resin base to create a rich texture and natural look. Crush is an ideal solution for outdoor applications like walkways, entrances and pool decks. Slip resistant and easy to clean, this troweled system elegantly draws the outdoors in.

Automotive Headquarters' Lobby & Showroom // Crush

Crush is as natural as it is beautiful and mirrors clean, natural design elements, as well as providing a slip-resistant, easy-to-clean surface that stands up to continuous foot traffic.

Red Abalone 	Sand Dollar 	Pearl 	Oyster Bay 	Oceania 
Sea Glass 	Seaweed 	Lagoon 	Atlantic Foam 	Waterfall 

The urban look of concrete with a smart, contemporary, mottled style, and a slightly textured surface. Polished rivals its competition in appearance and performance. The color palette includes 15 colors, both subtle and neutral, along with fresh coastal colors, all available in matte and gloss finishes. The stainable broadcast, used to create the mottled look of Polished, utilizes a component that is biogenic, 100% renewable and carbon negative.

SUSTAINABLE

Hospital Food Court & Waiting Area // Polished in a high-gloss finish
Healthcare environments require soothing palettes and strong performance. Polished delivers with reassuring design, slip resistance, durability, and an easy-to-maintain surface.

Wall panels provide intrigue and enrich spaces with the same unique, stunning finishes as our floors – glitter, filigree and high-gloss, resinous designs ensconced in easy-to-install wall panels. Handcrafted wall panels complement floors while creating their own spotlight on vertical spaces. Ask our architectural representative how we can help create wall panels for your next project.

wall panels

VERTICAL DESIGNS
COMPLEMENTARY TO FLOORS
EASILY INSTALLED

Wall panels are available in the same palettes as our floor systems. Custom colors and designs can be created to work with other design elements. We will provide samples.

Available on composite aluminum or MDF backer board.

Aluminum Panel size: 4' x 8'

MDF panel size: 4' x 8' or 5' x 10'

Shipped in flat panels to job site, to be installed by carpenter or millwork trade.

Transform ordinary into extraordinary. Our artfully poured floors, while still seamless, reliable and long-lasting, create even more attention when we partner with individual artists who produce exclusive, handcrafted, artistic expressions on floor surfaces.

If you are planning a masterpiece and one-of-a-kind space, our architectural representative can talk with you about our Artist Series.

finishes

GLOSS MICROTTEXTURE

SATIN

MATTE

Finishes give you even more options so you can achieve the look you want, along with the functionality you need. We offer three standard finishes.

GLOSS MICROTTEXTURE

This finish requires our Stonseal SK6-GT topcoat, which incorporates a high-performance, aliphatic polyurethane/polyurea topcoat along with a fine texture to offer improved slip resistance, wear resistance, and UV resistance. The Gloss Microtexture finish is easy to clean and does not require wax. Available with Smooth, Reflect, Glitz, Capture, and Polished floors.

SATIN

Silky, with an almost pearl-like sheen, this finish requires our Stonseal SK6-SF product, a high-performance, aliphatic polyurethane/polyurea topcoat combined with a durable polymer microsphere. This finish provides excellent wear resistance, UV resistance, is easy to clean, and does not require waxing. Available with Smooth, Reflect, Glitz, Capture, and Polished floors.

MATTE

Smooth and subtle, clear and flat, our matte finish utilizes our Stonseal CF7, which is a high-performance, water-based, aliphatic polyurethane coating that combines excellent wear resistance and UV resistance. Matte finishes are easy to clean and do not require waxing. Available with Smooth, Reflect, Glitz, Capture, and Polished floors.

Colors and finishes influence create atmosphere. Our seamless designs bring you unique design elements with outstanding performance.

THICKNESSES

Smooth, Reflect, Glitz, and Capture are offered in our standard 2mm thickness. Our 2mm versions provide a level, ergonomic surface that offers comfort superior to a traditional epoxy surface. Our floors are self-leveling and therefore require an extremely flat surface. This will typically require more rigorous preparation by our installation crew to produce the smoothest finish possible. 2mm floor systems also provide sound-dampening properties important in commercial spaces.

Note: This applies to our self-leveling systems only.

We offer a 1mm option for our Smooth, Glitz Mineral, and Reflect systems for those applications where a thinner system is specified – stadium concourses, automotive showrooms and in some cases, retail stores. The 1mm will closely follow the contour of the existing substrate and does not offer the same ergonomic and sound dampening properties. Our popular metallic finishes, along with richly pigmented duos and natural micas, maintain their pop and distinctive appearance even in a thinner application.

TRANSITIONS

Where a flush transition is desired, please contact your local Liquid Elements representative for recommendations.

Reno T

Recommended transition for all Liquid Elements systems between systems of similar height.

Reno U

Recommended transitions for Liquid Elements self-levelers when transitioning to tile or other flooring systems of different height.

Schiene

Recommended for strip designs and borders in Liquid Elements Crush.

Dilex BWB

Recommended to use as an expansion joint with Liquid Elements Crush.
